BITCOIN IS GOOD FOR BUSINESS

Accept payments with lower fees, get paid instantly, and reach millions of new customers — with zero contracts and zero hidden costs.

Bitcoin gives your business a faster, cheaper, more private way to get paid. No middlemen. No chargebacks. No contracts. Just money that settles in seconds, directly from your customers to you.

Below is the short version of why Bitcoin is good for business — and below that, every resource you need to start accepting it today.

Low fees with no minimums

Bitcoin enables you to receive payments directly from your customers, much like cash. The Bitcoin network operates without middlemen like banks and credit card companies that take hefty fees.

Instant settlement

Just like cash, Bitcoin's payments settle instantly. You don't need to wait for your credit card company or bank to pay you. Instead, you gain access to your money right away.

No chargebacks or fraud

Because Bitcoin payments happen directly between you and your customers, it's impossible for anyone to take your money back with a chargeback.

Counterfeit Bitcoin can not be sent on the Bitcoin Network, which means you never have to worry about fraudulent transactions that can cost your business money.

Get more customers

Millions of people own Bitcoin and want to spend their Bitcoin at places that accept it.

By simply accepting Bitcoin, your business can be listed on Bitcoin merchant maps and gain free exposure to new Bitcoin customers.

Accepting Bitcoin is 100% free. There are no contracts or hidden fees.

Everything you need to accept Bitcoin

Work through these resources at your own pace. Each one is a short, practical guide.
